# PRODUCT INTRODUCTION

ONE TANK BODY HAS MULTIPLE USES ———

## Main material

High-strength aluminum profile

Sound insulation glass

Polyester fiber sound-absorbing board

Medium density fiberboard

### *Multi-purpose*

Our mobile soundproof rooms are suitable for a variety of purposes and can meet the needs of different customers.

### *Integrity management*

Each soundproof room is composed of high-strength aluminum profiles, soundproof glass, polyester fiber sound-absorbing panels and MDF

### *Ingenious creation*

Designed and manufactured using professional mechanics solidworks engineering software, easy to install and reliable in structure

## DETAILS

## TIPS

SOUNDPROOF

VENTILATED

LIGHTING

100-240V POWER

#### SOUNDPROOF&SOUND INSULATION

The wall of the soundproof room is composed of sound-absorbing cotton + MDF (hollow structure) and 10mm thick soundproof tempered glass, and the sound insulation and noise reduction index meets the design expectations.

#### VENTILATED

Each soundproof room is designed with a labyrinth-like low-noise fresh air system composed of ultra-thin + ultra-quiet fresh air exhaust fan + PD principle long-path soundproof air duct. It only takes 3-5 minutes to renew the indoor air. Large-sized soundproof rooms can be equipped with air conditioning.

#### LIGHTING

The booth is equipped with 3000-6000K three-color temperature adjustable LED ceiling lights, which can basically meet the lighting needs of the booth.

#### 100-240V POWER

Every Booth is equipped with 100-240V/50-60Hz and 12V-USB power supply system, which can easily meet the use of mainstream electrical appliances in life.

# DETAILS

## Acoustic interior

The interiors are composed of polyester fiberboard with sound absorption, environmental protection, flame retardancy, decoration and easy processing. The thickness of the conventional sound-absorbing board is 9mm, and the thickness can be adjusted according to the needs of noise reduction.

## Sound insulation glass

The glass of each soundproof room is assembled with 10mm thick single-layer tempered glass. In order to increase safety, engineers put an explosion-proof film on each piece of glass.(The glass type can be customized according to requirements)

## Steel universal wheel

In order to facilitate the movement, each soundproof room is equipped with steel universal wheels, which can steer freely without pressure. At the same time, a steel foot cup is arranged next to each wheel to prevent the soundproof room from moving when it is stationary.

# DETAILS

## Furniture selection

In order to save your time, designers have preset furnishings for different usage scenarios according to different specifications of soundproof rooms for your reference.

## Safety power strip

Each soundproof room is equipped with a dual-control switch and a 220V five-hole socket with a network cable port, and a 220V five-hole socket with dual USB sockets.

## Anti-wear exterior

The sound-proof board finishes of the sound-proof room are environmentally friendly, wear-resistant, anti-pollution, fire-proof and moisture-proof. The color can be changed according to customer needs.
